Chris Clarke, 32, from Brighton, suffered from chronic acne as a teenager and this carried on beyond his teens, leaving him with deep acne scarring in later life. He has found Genuine Dermaroller to be the one treatment that has helped improve his skin.

He said: "I had tried all sorts of treatments but Genuine Dermaroller is definitely the best – it really does work, and quite significantly. I'd had dermabrasion, acid peels, Chinese medicine, every facial going – you name it, I'd done it. So for a long time, I had been looking for an answer. A friend of mine had had laser, and because the results weren't bad, I was going to do the same. Then Becky suggested that I try Genuine Dermaroller instead, and I'm pleased to say that the results of my Genuine Dermaroller treatment are significantly better than the results my friend had with laser.

"The difference in my skin since having Genuine Dermaroller is very noticeable, it's improved no end. People have asked if I've had collagen, or a face lift, it's taken years off me.

"The scarring I had was very bad, it really bothered me. I work in recruitment which means I have meetings all the time, and I used to notice people looking. Now, they only look at how good it looks in comparison!

"I have had four treatments, and have noticed improvement with every one. I'm going to have just one more."

- ★ Chris had **Genuine Dermaroller™ Therapy™** at Becky Hollands Aesthetics in Brighton. Clinics run from Brighton, Hove and Harley Street. See [www.beckyhollands.co.uk](http://www.beckyhollands.co.uk).
